## Datasheet for ABIN1609134 PRNP Protein (AA 16-215) (His tag)

Overview	
Quantity:	1 mg
Target:	PRNP
Protein Characteristics:	AA 16-215
Origin:	Black crested mangabey (Lophocebus aterrimus)
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This PRNP protein is labelled with His tag.
Application:	ELISA
Product Details	
Sequence:	KKRPK PGGWNTGGSR YPGQGSPGGN RYPPQGGGGW GQPHGGGWGQ PHGGGWGQPH
	GGGWGQGGGT HNQWHKPSKP KTSMKHMAGA AAAGAVVGGL GGYMLGSAMS RPLIHFGNDY
	EDRYYRENMY RYPNQVYYRP VDQYSNQNNF VHDCVNITIK QHTVTTTTKG ENFTETDVKM
	MERVVEQMCI TQYEKESQAY YQRGS
Specificity:	Lophocebus aterrimus (Black crested mangabey) (Cercocebus aterrimus)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien
	cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %
Target Details	
Target:	PRNP

Target Details	
Alternative Name:	Major prion protein (PRNP) (PRNP Products)
Background:	Recommended name: Major prion protein.
	Short name= PrP.
	Alternative name(s): PrP27-30 PrP33-35C CD_antigen= CD230
UniProt:	P67990
Pathways:	Transition Metal Ion Homeostasis, Activated T Cell Proliferation

## Application Details

Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system
	for secretion and intracellular expression. A protein expressed by the mammalian cell system is
	of very high-quality and close to the natural protein. But the low expression level, the high cost
	of medium and the culture conditions restrict the promotion of mammalian cell expression
	systems. The yeast protein expression system serve as a eukaryotic system integrate the
	advantages of the mammalian cell expression system. A protein expressed by yeast system
	could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the
	native protein conformation. It can be used to produce protein material with high added value
	that is very close to the natural protein. Our proteins produced by yeast expression system has
	been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions:

For Research Use only

## Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
