

Datasheet for ABIN1609480 IL4I1 Protein (AA 19-516) (His tag)

Overview

1 mg IL4I1 AA 19-516 Malayan pit viper (Calloselasma rhodostoma) Yeast Recombinant This IL4I1 protein is labelled with His tag. ELISA
AA 19-516 Malayan pit viper (Calloselasma rhodostoma) Yeast Recombinant This IL4I1 protein is labelled with His tag. ELISA

Product Details

Purity:

> 90 %

Target Details

Target:	IL4I1
Alternative Name:	L-amino-acid oxidase (IL4I1 Products)
Background:	Recommended name: L-amino-acid oxidase. Short name= LAAO.
	Short name= LAO.
	EC= 1.4.3.2
UniProt:	P81382

Application Details

Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system
	for secretion and intracellular expression. A protein expressed by the mammalian cell system is
	of very high-quality and close to the natural protein. But the low expression level, the high cost
	of medium and the culture conditions restrict the promotion of mammalian cell expression
	systems. The yeast protein expression system serve as a eukaryotic system integrate the
	advantages of the mammalian cell expression system. A protein expressed by yeast system
	could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the
	native protein conformation. It can be used to produce protein material with high added value
	that is very close to the natural protein. Our proteins produced by yeast expression system has
	been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions:

For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
