Datasheet for ABIN1609630 TCP1 alpha/CCTA Protein (AA 1-123) (His tag)

-online.com antibodies

Overview

Quantity:	1 mg
Target:	TCP1 alpha/CCTA (TCP1)
Protein Characteristics:	AA 1-123
Origin:	Golden Syrian Hamster
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This TCP1 alpha/CCTA protein is labelled with His tag.
Application:	ELISA
Product Details	
Sequence:	IHPTSVISGY RYISENLIIN TDELGRDCLI NAAKLGVQVV ITDPEKLDQI RYFVEAGAMA
	VRSVVPGGGA VEAALSIYLE NYATSMGSRE QLAIAEFARA FHNEAQVNPE RKFATEAAIT
	ILR
Specificity:	Mesocricetus auratus (Golden hamster)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalier
	cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %
Target Details	
Target:	TCP1 alpha/CCTA (TCP1)
Alternative Name:	T-complex protein 1 subunit alpha (TCP1) (TCP1 Products)

International: +49 (0)241 95 163 153 | USA & Canada: +1 877 302 8632 | support@antibodies-online.com Page 1/2 | Product datasheet for ABIN1609630 | 09/11/2023 | Copyright antibodies-online. All rights reserved.

Recommended name: T-complex protein 1 subunit alpha.
Short name= TCP-1-alpha.
Alternative name(s): CCT-alpha
P86208
The yeast protein expression system is the most economical and efficient eukaryotic system
for secretion and intracellular expression. A protein expressed by the mammalian cell system is
of very high-quality and close to the natural protein. But the low expression level, the high cost
of medium and the culture conditions restrict the promotion of mammalian cell expression
systems. The yeast protein expression system serve as a eukaryotic system integrate the
advantages of the mammalian cell expression system. A protein expressed by yeast system
could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the
native protein conformation. It can be used to produce protein material with high added value
that is very close to the natural protein. Our proteins produced by yeast expression system has
been used as raw materials for downstream preparation of monoclonal antibodies.
For Research Use only
Lyophilized
0.2-2 mg/mL
Tris-based buffer, 50 % glycerol
Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to
one week
-20 °C

Storage Comment: Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
