## Casein Kinase II Subunit beta (Ckb1) (AA 1-287) protein (His tag)

### Overview

Quantity:	1 mg
Target:	Casein Kinase II Subunit beta (Ckb1)
Protein Characteristics:	AA 1-287
Origin:	Arabidopsis thaliana
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	His tag
Application:	ELISA

### Product Details

Sequence:	MYRDRGTVNS RPEVDRKRI NDALERPSPS TSRQVNGK GK GTVTAATTTA NLIGKQQSNN INHRDSRSAS LSKNNTVSDD ESDTDSEESD VSGSDGEDTS WISWFCNLRG NEFFCEVDDD YIQDDFNLCG LSSLVPYYEY ALDLILDVES SQGEMFTEEQ NELIESAAEM LYGLIHARYI LTSKGLAAML DKYKNYDFGR CPRVYCCGQP CLPVGQSDLP RSSTVKIYCP KCEDIYYPRS KYQGNIDGAY FGTTFPHLFL MTYGHLPKPAK ATQNYVQRVF GFKLHKP
Specificity:	Arabidopsis thaliana (Mouse-ear cress)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

## Target Details

---

Target:	Casein Kinase II Subunit beta (Ckb1)
Abstract:	<a href="#">Ckb1 Products</a>
Background:	Recommended name: Casein kinase II subunit beta. Short name= CK II beta
UniProt:	<a href="#">P40228</a>

## Application Details

---

Comment:	<p>The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modified such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.</p>
Restrictions:	For Research Use only

## Handling

---

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
