

Datasheet for ABIN1610258 **PAX6 Protein (AA 1-437) (His tag)**

Go to Product page

C	۱۱ /	\cap	~\ /	ic	11/	1
	V	CI	V	IF	٧,	۷

Quantity:	1 mg
Target:	PAX6
Protein Characteristics:	AA 1-437
Origin:	Zebrafish (Danio rerio)
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This PAX6 protein is labelled with His tag.
Application:	ELISA

Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalie		
cells or by baculovirus infection. Be aware about differences in price and lead time.		

Product Details > 90 % Purity: **Target Details** Target: PAX6 Alternative Name Paired box protein Pax-6 (pax6a) (PAX6 Products) Background: Recommended name: Paired box protein Pax-6. Alternative name(s): Pax[Zf-a] UniProt: P26630 Pathways: Peptide Hormone Metabolism, Carbohydrate Homeostasis **Application Details** Comment: The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies. Restrictions: For Research Use only Handling Lyophilized Format: Concentration: 0.2-2 mg/mL Buffer: Tris-based buffer, 50 % glycerol Handling Advice: Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week

Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.

-20 °C
