Datasheet for ABIN1610573

Alternative Name:

SSR1 Protein (AA 230-288) (His tag)

Overview	
Quantity:	1 mg
Target:	SSR1
Protein Characteristics:	AA 230-288
Origin:	Rainbow Trout
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This SSR1 protein is labelled with His tag.
Application:	ELISA
Product Details	
Sequence:	L ESRTRKRFPV
	KVETGTGGMN GVDISWIPQE TLNIMSKASA SPKASPRKRT KRAVGVDQ
Specificity:	Oncorhynchus mykiss (Rainbow trout) (Salmo gairdneri)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien
	cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %
Target Details	
Target:	SSR1

Translocon-associated protein subunit alpha (ssr1) (SSR1 Products)

Target Details

Background:	Recommended name: Translocon-associated protein subunit alpha.
	Short name= TRAP-alpha.
	Alternative name(s): Signal sequence receptor subunit alpha.
	Short name= SSR-alpha
UniProt:	P45433
Pathways:	ER-Nucleus Signaling

Application Details

Comment:

The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions:

For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2.2 mg/ml
Concentration.	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to
	one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
