Datasheet for ABIN1610595

**WNT4 Protein (AA 1-119) (His tag)**

## Overview

Quantity:	1 mg
Target:	WNT4
Protein Characteristics:	AA 1-119
Origin:	Plestiodon skiltonianus
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This WNT4 protein is labelled with His tag.
Application:	ELISA

## Product Details

Sequence:	SGSCEVKTCW KAMPPFRKVG NVLKEKFDGA TEVEQRKIGS TKVLVPKNSQ FKPHTEDELV YLDSSPDFCD HDLKNGLVLT SGRHCNKTSK AIDGCELMCC GRGFHTDEVE VVERCSCKF
Specificity:	Plestiodon skiltonianus (Western skink) (Eumeces skiltonianus)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

## Target Details

Target:	WNT4
Alternative Name:	Protein Wnt-4 (WNT-4) ( <a href="#">WNT4 Products</a> )

## Target Details

Background:	Recommended name: Protein Wnt-4
UniProt:	<a href="#">P28116</a>
Pathways:	<a href="#">WNT Signaling</a> , <a href="#">Regulation of Hormone Metabolic Process</a> , <a href="#">Regulation of Hormone Biosynthetic Process</a> , <a href="#">Cell-Cell Junction Organization</a> , <a href="#">Tube Formation</a>

## Application Details

Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modified such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.
Restrictions:	For Research Use only

## Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
