## Datasheet for ABIN1610814 CETP Protein (AA 18-493) (His tag)

1 mg CETP AA 18-493 Cynomolgus Yeast
AA 18-493 Cynomolgus Yeast
Cynomolgus Yeast
Yeast
Recombinant
This CETP protein is labelled with His tag.

## Target Details

Target:	CETP
Abstract:	CETP Products
Background:	Recommended name: Cholesteryl ester transfer protein.
	Alternative name(s): Lipid transfer protein I
UniProt:	P47896
Application Details	
Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system
	for secretion and intracellular expression. A protein expressed by the mammalian cell system is
	of very high-quality and close to the natural protein. But the low expression level, the high cost
	of medium and the culture conditions restrict the promotion of mammalian cell expression
	systems. The yeast protein expression system serve as a eukaryotic system integrate the
	advantages of the mammalian cell expression system. A protein expressed by yeast system
	could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the

native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions:

For Research Use only

## Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
