SHBG Protein (AA 30-399) (His tag)

[Go to Product page](#)

Overview

Quantity:	1 mg
Target:	SHBG
Protein Characteristics:	AA 30-399
Origin:	Phodopus sungorus
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This SHBG protein is labelled with His tag.
Application:	ELISA

Specificity:	Phodopus sungorus (Striped hairy-footed hamster) (Djungarian hamster)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

Target Details

Target:	SHBG
Alternative Name:	Sex hormone-binding globulin (SHBG) (SHBG Products)
Background:	<p>Recommended name: Sex hormone-binding globulin.</p> <p>Short name= SHBG.</p> <p>Alternative name(s): Sex steroid-binding protein.</p> <p>Short name= SBP Testis-specific androgen-binding protein.</p> <p>Short name= ABP</p>
UniProt:	Q62588
Pathways:	Hormone Transport

Application Details

Comment:	<p>The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modified such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.</p>
Restrictions:	For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
