TOX2 Protein (AA 1-473) (His tag)

Go to Product page

()	1/0	r\ /1	014	
()	ve	I V I	-v	V

Quantity:	1 mg
Target:	TOX2
Protein Characteristics:	AA 1-473
Origin:	Rat
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This TOX2 protein is labelled with His tag.
Application:	ELISA

Product Details		
Sequence:	MSDGNPELLS TSQTYNSQGE SNEDYEIPPI TPPNLPEPSL LHLGDHEAGY HSLCHGLAPN

	SGSRSPGPSN PSSSGDWDGS YPSGERGLGT CRLCRSSPPP TTSPKNLQEP SAR	
Specificity:	Rattus norvegicus (Rat)	
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien cells or by baculovirus infection. Be aware about differences in price and lead time.	
	cells or by paculovirus infection. Be aware about differences in price and lead time.	

Product Details > 90 % Purity: **Target Details** TOX2 Target: Abstract: TOX2 Products Background: Recommended name: TOX high mobility group box family member 2. Alternative name(s): Granulosa cell HMG box protein 1. Short name= GCX-1 UniProt: Q76IQ7 **Application Details** Comment: The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies. Restrictions: For Research Use only Handling Format: Lyophilized Concentration: 0.2-2 mg/mL Buffer: Tris-based buffer, 50 % glycerol Handling Advice: Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week

Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.

-20 °C
