# Datasheet for ABIN1613185 PHF10 Protein (AA 1-490) (His tag)

Overview

| Quantity:                     | 1 mg   |
|-------------------------------|--|
| Target:                       | PHF10  |
| Protein Characteristics:      | AA 1-490                                     |
| Origin:                       | Zebrafish (Danio rerio)                      |
| Source:                       | Yeast  |
| Protein Type:                 | Recombinant                                  |
| Purification tag / Conjugate: | This PHF10 protein is labelled with His tag. |
| Application:                  | ELISA  |

#### Product Details

| Sequence:        | MAAVLSPRPC DSNPATPGTQ SIKDDIEENS SDGSQAPKRR RMGSGDSSRS CDTSTHELGP                                |

|                  | PPERTKTGPF PVALIPGQFQ EYYKRYSPNE LRYLPLNTAL FEPPLDPELP ALDSDGDSDD                                |
|                  | GDDGKEDGKK NKGSSDSSSG NTSDGDSQDS GIHSKVKSKD RPGAQGKDGT PRSIQHKSVP                                |
|                  | GYKPKVIPNA ICGICQKGKE ANKRGKPEAL IHCSQCQNSG HPSCLDMSVD LVAKIKMYPW                                |
|                  | QCMECKTCTV CQQPHHEEEM MFCDKCDRGF HTFCVGMDSI PMGCWVCDLC SKDISTPQKK                                |
|                  | GQTKTPKKAK   |
| Specificity:     | Danio rerio (Zebrafish) (Brachydanio rerio)  |
| Characteristics: | Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien |
|                  | cells or by baculovirus infection. Be aware about differences in price and lead time.            |
|                  |  |

## Target Details

| Target:     | PHF10                                   |
|-------------|---|
| Abstract:   | PHF10 Products                          |
| Background: | Recommended name: PHD finger protein 10 |
| UniProt:    | Q6NWE1                                  |

### Application Details

| Comment: | The yeast protein expression system is the most economical and efficient eukaryotic system         |
|----------|--|
|          | for secretion and intracellular expression. A protein expressed by the mammalian cell system is    |
|          | of very high-quality and close to the natural protein. But the low expression level, the high cost |
|          | of medium and the culture conditions restrict the promotion of mammalian cell expression           |
|          | systems. The yeast protein expression system serve as a eukaryotic system integrate the            |
|          | advantages of the mammalian cell expression system. A protein expressed by yeast system            |
|          | could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the     |
|          | native protein conformation. It can be used to produce protein material with high added value      |
|          | that is very close to the natural protein. Our proteins produced by yeast expression system has    |
|          | been used as raw materials for downstream preparation of monoclonal antibodies.                    |
|          |  |

Restrictions:

For Research Use only

### Handling

| Format:          | Lyophilized   |
|------------------|---|
| Concentration:   | 0.2-2 mg/mL   |
| Buffer:          | Tris-based buffer, 50 % glycerol  |
| Handling Advice: | Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week |
| Storage:         | -20 °C  |
| Storage Comment: | Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.                                |
