Datasheet for ABIN1615796 CAMK2N2 Protein (AA 1-79) (His tag)

Overview	
Overview	
Quantity:	1 mg
Target:	CAMK2N2
Protein Characteristics:	AA 1-79
Origin:	Rat
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This CAMK2N2 protein is labelled with His tag.
Application:	ELISA
Product Details	
Sequence:	MSEILPYGED KMGRFGADPE GSDLSFSCRL QDTNSFFAGN QAKRPPKLGQ IGRAKRVVIE
	DDRIDDVLKG MGEKPPSGV
Specificity:	
	Rattus norvegicus (Rat)
Characteristics:	Rattus norvegicus (Rat) Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien
Characteristics:	
Characteristics: Purity:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien
Purity:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien cells or by baculovirus infection. Be aware about differences in price and lead time.
	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien cells or by baculovirus infection. Be aware about differences in price and lead time.

Recommended name: Calcium/calmodulin-dependent protein kinase II inhibitor 2.
Alternative name(s): CaM-KII inhibitory protein.
Short name= CaM-KIIN CaM-KIINbeta
Q9Z2N6
The yeast protein expression system is the most economical and efficient eukaryotic system
for secretion and intracellular expression. A protein expressed by the mammalian cell system is
of very high-quality and close to the natural protein. But the low expression level, the high cost
of medium and the culture conditions restrict the promotion of mammalian cell expression
systems. The yeast protein expression system serve as a eukaryotic system integrate the
advantages of the mammalian cell expression system. A protein expressed by yeast system
could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the
native protein conformation. It can be used to produce protein material with high added value
that is very close to the natural protein. Our proteins produced by yeast expression system has
been used as raw materials for downstream preparation of monoclonal antibodies.
For Research Use only
Lyophilized
0.2-2 mg/mL
Tris-based buffer, 50 % glycerol
Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week

Storage Comment: Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.

-20 °C

Storage:
