Datasheet for ABIN1615863  
**MXD1 Protein (AA 1-221) (His tag)**

### Overview

Quantity:	1 mg
Target:	MXD1
Protein Characteristics:	AA 1-221
Origin:	Xenopus laevis
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This MXD1 protein is labelled with His tag.
Application:	ELISA

### Product Details

Sequence:	MAAPVCVNIQ MLLEAAEYLE RREREAHEGY ASMLPYNSKE RDGLKRKSKS KKSSSSRSTH NEMEKNRRAH LRLCLEKMKM LVPLGPESNR HTTLLMRA KLHIKKLEDC DKRSVHQIEQ LQREQRHLTR QLEKFGVERT RMDSIGSAMS SERSDSDREE IDVDVESTDY LTAELDWSSS SSSVSDLDER ESMQSICSDE GYSSSGLKSI GLQNNPKSIA L
Specificity:	Xenopus laevis (African clawed frog)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

### Target Details

Target:	MXD1
---------	------

## Target Details

---

Abstract: [MXD1 Products](#)

---

Background: Recommended name: Max dimerization protein 1.  
Short name= Max dimerizer 1.  
Alternative name(s): Protein MAD

---

UniProt: [Q0VH34](#)

---

## Application Details

---

Comment: The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modified such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

---

Restrictions: For Research Use only

---

## Handling

---

Format: Lyophilized

---

Concentration: 0.2-2 mg/mL

---

Buffer: Tris-based buffer, 50 % glycerol

---

Handling Advice: Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week

---

Storage: -20 °C

---

Storage Comment: Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.

---
