TMX1 Protein (AA 27-180) (His tag)

0	1//	r	1//	۱۸/
\cup	V	-I	VΙ	٧V

Quantity:	1 mg
Target:	TMX1
Protein Characteristics:	AA 27-180
Origin:	Cow
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This TMX1 protein is labelled with His tag.
Application:	ELISA
Product Details	
Sequence:	KRSD VRIITDENWR ELLEGEWMIE FYAPWCPACQ NLQPEWESFA EWGEDLEVNV AKVDVTEQPG
	LSGRFIITAL PTIYHCKDGE FRRYQGPRTK KDFINFISDK EWKSIEPVSS WFGPGSILMS
	SMSALFQLSM WIRTCHNYFI EDLGLPIWGS
Specificity:	Bos taurus (Bovine)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien
	cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	cells or by baculovirus infection. Be aware about differences in price and lead time. > 90 %
Purity: Target Details	
,	

Target Details

Background:	Recommended name: Thioredoxin-related transmembrane protein 1. Alternative name(s): Thioredoxin domain-containing protein 1	
UniProt:	Q0Z7W6	
Pathways:	Cell RedoxHomeostasis	

Application Details

Comment:

The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions:

For Research Use only

Handling

Format:	Lyophilized	
Concentration:	0.2-2 mg/mL	
Buffer:	Tris-based buffer, 50 % glycerol	
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week	
Storage:	-20 °C	
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
