Quantity:	1 mg	
Target:	NR2C2AP	
Protein Characteristics:	AA 1-141	
Origin:	Zebrafish (Danio rerio)	
Source:	Yeast	
Protein Type:	Recombinant	
Purification tag / Conjugate:	This NR2C2AP protein is labelled with His tag.	
Application:	ELISA	
Product Details		
Sequence:	MAESLICNST QSRVSSVLNR DVKQFGKKFM FDSNEETCWN SDQGESQWVL LEFPQHVKVS	
	EVRLQFQGGF SGKSCKLEGS SKDENLRHIL NFYPEDNNSL QSFPIPDAPL VQKLKIVFEN	
	STDFFGRIIV YTLDILGEKD L	
Specificity:	Danio rerio (Zebrafish) (Brachydanio rerio)	

### **Target Details**

Characteristics:

Purity:

Target:	NR2C2AP	
Abstract:	NR2C2AP Products	

Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien

cells or by baculovirus infection. Be aware about differences in price and lead time.

#### **Target Details**

Background:	Recommended name: Nuclear receptor 2C2-associated protein.  Alternative name(s): TR4 orphan receptor-associated 16 kDa protein homolog	
UniProt:	Q1ED21	
Pathways:	Nuclear Receptor Transcription Pathway	

#### **Application Details**

#### Comment:

The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions:

For Research Use only

#### Handling

Format:	Lyophilized	
Concentration:	0.2-2 mg/mL	
Buffer:	Tris-based buffer, 50 % glycerol	
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week	
Storage:	-20 °C	
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
