## CALU Protein (AA 20-315) (His tag)

> 90 %

$\sim$	
( )\/△	rview
$\cup$	1 410 44

Purity:

Quantity:	1 mg
Target:	CALU
Protein Characteristics:	AA 20-315
Origin:	Cow
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This CALU protein is labelled with His tag.
Application:	ELISA
Product Details	
Sequence:	K PTEKKDRVHH EPQLSDKVHN DAQSFDYDHD AFLGAEEAKT FDQLTPEESK ERLGMIVDKI DADKDGFVTE GELKSWIKHA QKKYIYDNVE NQWQEFDLNQ DGLISWDEYR NVTYGTYLDD PDPDDGFNYK QMMVRDERRF KMADKDGDLI ATKEEFTAFL HPEEYDYMKD IVVQEPMEDI DKNADGFIDL EEYIGDMYSH DGNADEPEWV KTEREQFVEF RDKNRDGKMD KEETKDWILP SDYDHAEAEA RHLVYESDQN KDGKLTKEEI VDKYDLFVGS QATDFGEALV RHDEF
Specificity:	Bos taurus (Bovine)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien

#### **Target Details**

Target:	CALU
Abstract:	CALU Products
Background:	Recommended name: Calumenin
UniProt:	Q3T0K1

### **Application Details**

#### Comment:

The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions:

For Research Use only

### Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
