

Datasheet for ABIN1616785

FGF23 Protein (AA 24-263) (His tag)[Go to Product page](#)

Overview

Quantity:	1 mg
Target:	FGF23
Protein Characteristics:	AA 24-263
Origin:	Tetraodon nigroviridis
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This FGF23 protein is labelled with His tag.
Application:	ELISA

Product Details

Sequence:	CPLGETA PNASPLVGSN WGNPRRYVHL QTSTDMSNFY LEIRLDGTVR KSTARTSYSV ILLKADTRER IAILGVKSNR YLCMDLEGSP FSSPTCIRDD CLFNHSLLEN NRDVYYSSRT GILFNLEGSR QVFVVGQNVP QTSFLPLRTN TVPLERLLLH RDKRNQVVDV SDPHRVAVGR AEEGSDSRAL QEDDADLEVE TEVEVGDDGR NASRERLQAP SDHDPWGVFS SNPGSPRSSG TVG
Specificity:	Tetraodon nigroviridis (Spotted green pufferfish) (Chelonodon nigroviridis)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

Target Details

Target:	FGF23
---------	-------

Target Details

Abstract:	FGF23 Products
Background:	Recommended name: Fibroblast growth factor 23. Short name= FGF-23
UniProt:	Q5MK86
Pathways:	RTK Signaling , Fc-epsilon Receptor Signaling Pathway , EGFR Signaling Pathway , Neurotrophin Signaling Pathway , Negative Regulation of Hormone Secretion

Application Details

Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modiflicated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.
Restrictions:	For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
