Datasheet for ABIN1617287

**NDUFV2 Protein (AA 33-249) (His tag)**

## Overview

Quantity:	1 mg
Target:	NDUFV2
Protein Characteristics:	AA 33-249
Origin:	Pongo pygmaeus
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This NDUFV2 protein is labelled with His tag.
Application:	ELISA

## Product Details

Sequence:	GAGGALFV HRDTPENNPD TPFDFTPENY KRIEAIKKNY PEGHKAAAVL PVLDLAQRQN GWLPIAMNK VAEVLQVPPM RVYEVATFYT MYNRKPVGKY HIQVCTTTPC MLRNSDSILE AIQKKLGIV GETTPDKLFT LIEVECLGAC VNAPMVQIND NYEDLTAKD IEEIDELKA GKIPKPGPRS GRFSCEPAGG LTSLTEPPKG PGFGVQAGL
Specificity:	Pongo pygmaeus (Bornean orangutan)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

## Target Details

Target:	NDUFV2
---------	--------

## Target Details

Alternative Name:	NADH dehydrogenase [ubiquinone] flavoprotein 2, mitochondrial (NDUFV2) ( <a href="#">NDUFV2 Products</a> )
Background:	Recommended name: NADH dehydrogenase [ubiquinone] flavoprotein 2, mitochondrial. EC= 1.6.5.3. EC= 1.6.99.3. Alternative name(s): NADH-ubiquinone oxidoreductase 24 kDa subunit
UniProt:	<a href="#">Q0MQI7</a>

## Application Details

Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modiflicated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.
Restrictions:	For Research Use only

## Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
