

Datasheet for ABIN1617571 SPANXN3 Protein (AA 1-140) (His tag)

Go to Froduct page

Overview	
Quantity:	1 mg
Target:	SPANXN3
Protein Characteristics:	AA 1-140
Origin:	Chimpanzee
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This SPANXN3 protein is labelled with His tag.
Application:	ELISA
Product Details	
Sequence:	MEQPTSSTNG EKTKSPCKSN SENDEMQEVP NRVLAPEQSL KKTKTSEYPI IFVYYRRKGK
	KINSNQLEND QSQENSINPV QKEEDEGLGL SEGSSNEDED LGPSEGPSKE DKDLDSSEGS
	SQENEDLGLS EGSSQDSGED
Specificity:	Pan troglodytes (Chimpanzee)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien
	cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %
Target Details	
Target:	SPANXN3
Alternative Name:	Sperm protein associated with the nucleus on the X chromosome N3 (SPANXN3) (SPANXN3

Target Details

	Products)
Background:	Recommended name: Sperm protein associated with the nucleus on the X chromosome N3.
	Alternative name(s): Nuclear-associated protein SPAN-Xn3.
	Short name= SPANX-N3 SPANX family member N3
UniProt:	Q0ZNK1

Application Details

Comment:

The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions:

For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
