## Calmodulin 3 Protein (CALM3) (AA 2-149) (His tag)

( )	1/0	r\ /1	014	
( )	ve	I V I	-v	V

Quantity:       1 mg         Target:       Calmodulin 3 (CALM3)         Protein Characteristics:       AA 2-149         Origin:       Oryza sativa         Source:       Yeast         Protein Type:       Recombinant         Purification tag / Conjugate:       This Calmodulin 3 protein is labelled with His tag.         Application:       ELISA         Product Details         Sequence:       ADQLTDDQI AEFKEAFSLF DKDGDGCITT KELGTVMRSL GQNPTEAELQ DMINEVD NGTIDFPEFL NLMARKMKDT DSEEELKEAF RVFDKDQNGF ISAAELRHVM TNLGER EVEEMIREAD VDGDGQINYD EFVKVMMAK         Specificity:       Oryza sativa subsp. japonica (Rice)         Characteristics:       Please inquire if you are interested in this recombinant protein expressed in E. col cells or by baculovirus infection. Be aware about differences in price and lead time.         Purity:       > 90 %         Target Details         Target:       Calmodulin 3 (CALM3)		
Protein Characteristics: AA 2-149  Origin: Oryza sativa  Source: Yeast  Protein Type: Recombinant  Purification tag / Conjugate: This Calmodulin 3 protein is labelled with His tag.  Application: ELISA  Product Details  Sequence: ADQLTDDQI AEFKEAFSLF DKDGDGCITT KELGTVMRSL GQNPTEAELQ DMINEVD NGTIDFPEFL NLMARKMKDT DSEELKEAF RVFDKDQNGF ISAAELRHVM TNLGEI EVEEMIREAD VDGDGQINYD EFVKVMMAK  Specificity: Oryza sativa subsp. japonica (Rice)  Characteristics: Please inquire if you are interested in this recombinant protein expressed in E. col cells or by baculovirus infection. Be aware about differences in price and lead time.  Purity: > 90 %  Target Details		
Origin:  Oryza sativa  Source:  Yeast  Protein Type:  Recombinant  Purification tag / Conjugate:  This Calmodulin 3 protein is labelled with His tag. EVEEMIREAD VDGDGQINYD EFVKVMMAK  Specificity: Oryza sativa subsp. japonica (Rice)  Characteristics: Please inquire if you are interested in this recombinant protein expressed in E. col cells or by baculovirus infection. Be aware about differences in price and lead time.  Purity: > 90 %  Target Details	DADG	
Specificity: Oryza sativa subsp. japonica (Rice)  Characteristics: Please inquire if you are interested in this recombinant protein expressed in E. col cells or by baculovirus infection. Be aware about differences in price and lead time.  Purity: > 90 %  Target Details	KLTDE	
Characteristics:  Please inquire if you are interested in this recombinant protein expressed in E. col cells or by baculovirus infection. Be aware about differences in price and lead time.  Purity:  > 90 %  Target Details		
cells or by baculovirus infection. Be aware about differences in price and lead time.  Purity: > 90 %  Target Details		
Purity: > 90 %  Target Details	li, mammalien	
Target Details	ne.	
Target: Calmodulin 3 (CALM3)		
Alternative Name: Calmodulin-3 (CAM3) (CALM3 Products)		

#### **Target Details**

Background:	Recommended name: Calmodulin-3.  Short name= CaM-3	
UniProt:	Q0JNL7	
Pathways:	cAMP Metabolic Process, Myometrial Relaxation and Contraction, G-protein mediated Events, Interaction of EGFR with phospholipase C-gamma, Phototransduction	

#### **Application Details**

#### Comment:

The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions:

For Research Use only

### Handling

Format:	Lyophilized	
Concentration:	0.2-2 mg/mL	
Buffer:	Tris-based buffer, 50 % glycerol	
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week	
Storage:	-20 °C	
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
