Protein Translation Factor SUI1 Homolog (TIF1) (AA 1-115) protein (His tag)

()\	ve	K\ /	01	Α .
1 11	$/ \square$	I \/ I	\square	/\/

Target:

Alternative Name:

Overview	
Quantity:	1 mg
Target:	Protein Translation Factor SUI1 Homolog (TIF1)
Protein Characteristics:	AA 1-115
Origin:	Oryza sativa
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	His tag
Application:	ELISA
Product Details	
Sequence:	MSDLDIQIPT AFDPFAEANA GDSGAAAGSK DYVHVRIQQR NGRKSLTTVQ GLKKEFSYNK
	ILKDLKKEFC CNGTVVQDPE LGQVIQLQGD QRKNVSNFLV QAGIVKKEHI KIHGF
Specificity:	Oryza sativa subsp. japonica (Rice)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien
	cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %
Target Details

Protein translation factor SUI1 homolog (GOS2) (TIF1 Products)

Protein Translation Factor SUI1 Homolog (TIF1)

Target Details

Background:	Recommended name: Protein translation factor SUI1 homolog.
	Alternative name(s): Protein GOS2 Protein eIF1 Translation initiation factor 1
UniProt:	Q0D5W6

Application Details

Comment:

The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions:

For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
