## Datasheet for ABIN1618408 GLO3 Protein (AA 1-483) (His tag)

Overview

Quantity:	1 mg
Target:	GL03
Protein Characteristics:	AA 1-483
Origin:	Schizosaccharomyces pombe
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This GLO3 protein is labelled with His tag.
Application:	ELISA
Product Details	
Sequence:	MTATKEESQK LLTSLRSQRD NKVCFDCGAK NPTWSSTTFG IYLCLDCSAA HRNMGVHISF
	VRSTVLDSWT YAQLRVMRVG GNENARNYFK RHGGVSLLNS KDCRLKYSSK TAKQYLEKLK

	KSYFGEEEDE NEEGESSHRP DSAYLRDIAE TATEDIEAIK VAIHQGAEKL SDFIQKVGAR YNF
Specificity:	Schizosaccharomyces pombe (strain 972 / ATCC 24843) (Fission yeast)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien
	cells or by baculovirus infection. Be aware about differences in price and lead time.

### Target Details

Target:	GL03
Alternative Name:	ADP-ribosylation factor GTPase-activating protein glo3 (glo3) (GLO3 Products)
Background:	Recommended name: ADP-ribosylation factor GTPase-activating protein glo3. Short name= ARF GAP glo3
UniProt:	Q10367

# Application Details

Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system
	for secretion and intracellular expression. A protein expressed by the mammalian cell system is
	of very high-quality and close to the natural protein. But the low expression level, the high cost
	of medium and the culture conditions restrict the promotion of mammalian cell expression
	systems. The yeast protein expression system serve as a eukaryotic system integrate the
	advantages of the mammalian cell expression system. A protein expressed by yeast system
	could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the
	native protein conformation. It can be used to produce protein material with high added value
	that is very close to the natural protein. Our proteins produced by yeast expression system has
	been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions:

For Research Use only

#### Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
