Datasheet for ABIN1620423  
**EIF3G Protein (AA 1-274) (His tag)**

### Overview

Quantity:	1 mg
Target:	EIF3G
Protein Characteristics:	AA 1-274
Origin:	Bombyx mori
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This EIF3G protein is labelled with His tag.
Application:	ELISA

### Product Details

Sequence:	MPVAEEFQAS WADEVEIDQG VLPPPSEVVE NGLKIVTEYK YDNDNKKVKI VRTYKIEKRV VSKSIKRKT WSKFGDSASD KPGPNPATTN VAEDVFMQFI TSKEESQRPD DGELDGLKPP SSNVIFKCRT CQGDHLTYC PFKHTQIAQA KTAEAAKAAE AKVAASNKYI PPSSAGRIPG RDQPPVSRED VTAIRISNLS NFAVEADIDD LVKGFPGPVHK LYLAKEKSTG HCKGFAYVHF KFRADAAKAI QSLNGHGYDH LILNVEWSKP PQNN
Specificity:	Bombyx mori (Silk moth)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

## Target Details

---

Target:	EIF3G
Alternative Name:	Eukaryotic Translation Initiation Factor 3 Subunit G (eIF3-S4) ( <a href="#">EIF3G Products</a> )
Background:	Recommended name: Eukaryotic translation initiation factor 3 subunit G. Short name= eIF3g. Alternative name(s): Eukaryotic translation initiation factor 3 RNA-binding subunit. Short name= eIF-3 RNA-binding subunit Eukaryotic translation initiation factor 3 subunit 4
UniProt:	<a href="#">Q1HE00</a>
Pathways:	<a href="#">Ribonucleoprotein Complex Subunit Organization</a>

## Application Details

---

Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modiflicated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.
Restrictions:	For Research Use only

## Handling

---

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
