## Datasheet for ABIN1620487 WNT7A Protein (AA 32-349) (His tag)

| Overview                      |  |
|-------------------------------|--|
| Quantity:                     | 1 mg   |
| Target:                       | WNT7A  |
| Protein Characteristics:      | AA 32-349  |
| Origin:                       | Cynomolgus   |
| Source:                       | Yeast  |
| Protein Type:                 | Recombinant  |
| Purification tag / Conjugate: | This WNT7A protein is labelled with His tag.   |
| Application:                  | ELISA  |
| Product Details               |  |
| Sequence:                     | LGASIICNK IPGLAPRQRA ICQSRPDAII VIGEGSQMGL DECQFQFRNG RWNCSALGER<br>TVFGKELKVG SREAAFTYAI IAAGVAHAIT AACTQGNLSD CGCDKEKQGQ YHRDEGWKWG<br>GCSADIRYGI GFAKVFVDAR EIKQNARTLM NLHNNEAGRK ILEENMKLEC KCHGVSGSCT<br>TKTCWTTLPQ FRELGYVLKD KYNEAVHVEP VRASRNKRPT FLKIKKPLSY RKPMDTDLVY<br>IEKSPNYCEE DPVTGSVGTQ GRACNKTAPQ ASGCDLMCCG RGYNTHQYAR VWQCNCKFHW<br>CCYVKCNTCS ERTEMYTCK |
| Specificity:                  | Macaca fascicularis (Crab-eating macaque) (Cynomolgus monkey)  |
| Characteristics:              | Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien cells or by baculovirus infection. Be aware about differences in price and lead time.   |
| Purity:                       | > 90 %   |

| Target Details    |   |
|-------------------|---|
| Target:           | WNT7A   |
| Alternative Name: | Protein Wnt-7a (WNT7A) (WNT7A Products)                               |
| Background:       | Recommended name: Protein Wnt-7a                                      |
| UniProt:          | Q1KYK9  |
| Pathways:         | WNT Signaling, Stem Cell Maintenance, Asymmetric Protein Localization |

## Application Details

| Comment:      | The yeast protein expression system is the most economical and efficient eukaryotic system         |
|---------------|--|
|               | for secretion and intracellular expression. A protein expressed by the mammalian cell system is    |
|               | of very high-quality and close to the natural protein. But the low expression level, the high cost |
|               | of medium and the culture conditions restrict the promotion of mammalian cell expression           |
|               | systems. The yeast protein expression system serve as a eukaryotic system integrate the            |
|               | advantages of the mammalian cell expression system. A protein expressed by yeast system            |
|               | could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the     |
|               | native protein conformation. It can be used to produce protein material with high added value      |
|               | that is very close to the natural protein. Our proteins produced by yeast expression system has    |
|               | been used as raw materials for downstream preparation of monoclonal antibodies.                    |
| Restrictions: | For Research Use only  |

## Handling

| Format:          | Lyophilized   |
|------------------|---|
| Concentration:   | 0.2-2 mg/mL   |
| Buffer:          | Tris-based buffer, 50 % glycerol  |
| Handling Advice: | Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week |
| Storage:         | -20 °C  |
| Storage Comment: | Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.                                |
