Target Details

| Target: | CEP41 |
|-------------------|---|
| Alternative Name: | Centrosomal protein of 41 kDa (cep41) (CEP41 Products) |
| Background: | Recommended name: Centrosomal protein of 41 kDa. Short name= Cep41. Alternative name(s): Testis-specific gene A14 protein |
| UniProt: | Q28FA8 |
| Pathways: | M Phase |

Application Details

| Commont: | The vesset protein expression existem is the most economical and efficient evidencetic existem |
|---------------|--|
| Comment: | The yeast protein expression system is the most economical and efficient eukaryotic system |
| | for secretion and intracellular expression. A protein expressed by the mammalian cell system is |
| | of very high-quality and close to the natural protein. But the low expression level, the high cost |
| | of medium and the culture conditions restrict the promotion of mammalian cell expression |
| | systems. The yeast protein expression system serve as a eukaryotic system integrate the |
| | advantages of the mammalian cell expression system. A protein expressed by yeast system |
| | could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the |
| | native protein conformation. It can be used to produce protein material with high added value |
| | that is very close to the natural protein. Our proteins produced by yeast expression system has |
| | been used as raw materials for downstream preparation of monoclonal antibodies. |
| Restrictions: | For Research Use only |

Handling

| Format: | Lyophilized |
|------------------|---|
| Concentration: | 0.2-2 mg/mL |
| Buffer: | Tris-based buffer, 50 % glycerol |
| Handling Advice: | Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week |
| Storage: | -20 °C |
| Storage Comment: | Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C. |
