

Datasheet for ABIN1621584

CRHBP Protein (AA 24-324) (His tag)

[Go to Product page](#)

Overview

Quantity:	1 mg
Target:	CRHBP
Protein Characteristics:	AA 24-324
Origin:	Sheep
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This CRHBP protein is labelled with His tag.
Application:	ELISA

Product Details

Sequence:	RYLELRE AVDHDPFPHL AGGASPKREL EGEPLYRRAL RCVDMLSLQG QFTFTADRRQ LHCATFFIAE PEEFITIHVD LVSIDCLRGD ILQVFDGWIL KGEKFPSSQD HPLPTTERYV DFCDSGLSRR SIRSSQNVAM IFFRVHEPGN GFTITVKTEP NLFPCNIISQ TPNGRFTLVM PHQHRNCSFS IYPVAIKIS DLTGLGHLNGL QLKSSAGCG GIGDFVELLG GTGLDPSKML LLADLCYPLR GPAQMKVGCD HTVLRMVSSG KHINRVTFEY RQLEPYELEN PNGNSIQEFC LSTL
Specificity:	Ovis aries (Sheep)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

Target Details

Target:	CRHBP
Alternative Name:	Corticotropin-releasing factor-binding protein (CRHBP) (CRHBP Products)
Background:	<p>Recommended name: Corticotropin-releasing factor-binding protein.</p> <p>Short name= CRF-BP.</p> <p>Short name= CRF-binding protein.</p> <p>Alternative name(s): Corticotropin-releasing hormone-binding protein.</p> <p>Short name= CRH-BP</p>
UniProt:	Q28557
Pathways:	Negative Regulation of Hormone Secretion

Application Details

Comment:	<p>The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modified such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.</p>
Restrictions:	For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
