Datasheet for ABIN1622101 RPL11 Protein (AA 2-178) (His tag)

Alternative Name:	60S ribosomal protein L11 (RPL11) (RPL11 Products)
Target:	RPL11
Target Details	
Purity:	> 90 %
	cells or by baculovirus infection. Be aware about differences in price and lead time.
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalier
Specificity:	Sus scrofa (Pig)
	PSIGIYGLDF YVVLGRPGFS IADKKRRTGC IGAKHRISKE EAMRWFQQKH DGIILPGN
	GIRRNEKIAV HCTVRGAKAE EILEKGLKVR EYELRKNNFS DTGNFGFGIQ EHIDLGIKYD
Sequence:	AQDQGEKEN PMRELRIRKL CLNICVGESG DRLTRAAKVL EQLTGQTPVF SKARYTVRSF
Product Details	
Application:	ELISA
Purification tag / Conjugate:	This RPL11 protein is labelled with His tag.
Protein Type:	Recombinant
Source:	Yeast
Origin:	Pig
Protein Characteristics:	AA 2-178
Target:	RPL11
Quantity:	1 mg
Overview

Background: UniProt:	Recommended name: 60S ribosomal protein L11 Q29205
UniProt:	Q29205
Application Details	
Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system
	for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost
	of medium and the culture conditions restrict the promotion of mammalian cell expression
	systems. The yeast protein expression system serve as a eukaryotic system integrate the
	advantages of the mammalian cell expression system. A protein expressed by yeast system
	could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the
	native protein conformation. It can be used to produce protein material with high added value
	that is very close to the natural protein. Our proteins produced by yeast expression system has
	been used as raw materials for downstream preparation of monoclonal antibodies.
Restrictions:	For Research Use only
Handling	
Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice: Storage:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
