VTI1B Protein (AA 2-208) (His tag)

		Go to Product page

Overview	
Quantity:	1 mg
Target:	VTI1B
Protein Characteristics:	AA 2-208
Origin:	Cow
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This VTI1B protein is labelled with His tag.
Application:	ELISA
Product Details	
Sequence:	ATSAASSEH FEKLHEIFRG LHEDLRGVPE RLLGMAGTEE KKKLIRDFDE KQQEANETLA
	EMEEELRYAP LSFRNPMMSK LRTYRKDLAK LHREVRSTPL TATPGARGDM KYGTYAVENE
	HMNRLQSQRA LLLQGTDSLN RATQSIERSH RIAAETDQIG SEIIEELGEQ RDQLERTKSR
	LVNTSENLSK SRKILRSMSR KVTTNKLL
Specificity:	Bos taurus (Bovine)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien
	cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %
Target Details	
Target:	VTI1B

Target Details

Abstract:	VTI1B Products	
Background:	Recommended name: Vesicle transport through interaction with t-SNAREs homolog 1B	
UniProt:	Q2KIU0	

Application Details

Comment:

The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions:

For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
