

## Datasheet for ABIN1622675 RNASE1 Protein (AA 1-84) (His tag)

Overview Quantity: 1 mg Target: RNASE1 Protein Characteristics: AA 1-84 Giraffe Origin: Yeast Source: Protein Type: Recombinant Purification tag / Conjugate: This RNASE1 protein is labelled with His tag. Application: ELISA **Product Details** FCRKMTQGKC KPVNTFGHES LANVQAVCSQ KKVICKNGLS NCYQSNSAIH YTDCRKTGSS Sequence: NYPNCAYKTT RAEKRIIVAC EGNL Specificity: Giraffa camelopardalis (Giraffe) Characteristics: Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien cells or by baculovirus infection. Be aware about differences in price and lead time. Purity: > 90 % **Target Details** 

| Target:           | RNASE1                                       |
|-------------------|--|
| Alternative Name: | Seminal ribonuclease (SRN) (RNASE1 Products) |

| Target Details |   |
|----------------|---|
| Background:    | Recommended name: Seminal ribonuclease. |
|                | Short name= Seminal RNase.              |
|                | EC= 3.1.27.5                            |
| UniProt:       | Q29535                                  |
|                |   |

## Application Details

| Comment: | The yeast protein expression system is the most economical and efficient eukaryotic system         |
|----------|--|
|          | for secretion and intracellular expression. A protein expressed by the mammalian cell system is    |
|          | of very high-quality and close to the natural protein. But the low expression level, the high cost |
|          | of medium and the culture conditions restrict the promotion of mammalian cell expression           |
|          | systems. The yeast protein expression system serve as a eukaryotic system integrate the            |
|          | advantages of the mammalian cell expression system. A protein expressed by yeast system            |
|          | could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the     |
|          | native protein conformation. It can be used to produce protein material with high added value      |
|          | that is very close to the natural protein. Our proteins produced by yeast expression system has    |
|          | been used as raw materials for downstream preparation of monoclonal antibodies.                    |

Restrictions:

For Research Use only

## Handling

| Format:          | Lyophilized   |
|------------------|---|
| Concentration:   | 0.2-2 mg/mL   |
| Buffer:          | Tris-based buffer, 50 % glycerol  |
| Handling Advice: | Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week |
| Storage:         | -20 °C  |
| Storage Comment: | Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.                                |
