Datasheet for ABIN1622743

**TCEAL1 Protein (AA 1-159) (His tag)**

## Overview

Quantity:	1 mg
Target:	TCEAL1
Protein Characteristics:	AA 1-159
Origin:	Cow
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This TCEAL1 protein is labelled with His tag.
Application:	ELISA

## Product Details

Sequence:	MEKACKEPEE QPQSPPKADE ERPSVEPSPE KSSPEEQSSE EVSSEEEFFP DELLPELLPE MLESEERPPQ ERLSRKDLFE ARPPMEQPPC GVGKHKLEEG SFKERLARSR PQFRGDIHGR NLSNEEMIKV AEEMEEMKRV RNKLMVMHWK ARNRPYPI
Specificity:	Bos taurus (Bovine)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

## Target Details

Target:	TCEAL1
Alternative Name:	Transcription elongation factor A protein-like 1 (TCEAL1) ( <a href="#">TCEAL1 Products</a> )

## Target Details

Background:	Recommended name: Transcription elongation factor A protein-like 1. Short name= TCEA-like protein 1. Alternative name(s): Transcription elongation factor S-II protein-like 1
-------------	---

UniProt:	<a href="#">Q2KIJ9</a>
----------	------------------------

## Application Details

Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modified such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions:	For Research Use only
---------------	-----------------------

## Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
