## Datasheet for ABIN1622784 RPS19 Protein (AA 2-136) (His tag)

Overview	
Quantity:	1 mg
Target:	RPS19
Protein Characteristics:	AA 2-136
Origin:	Pig
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This RPS19 protein is labelled with His tag.
Application:	ELISA
Product Details	
Sequence:	PGVTVKDVN QQEFVRALAA FLKKSGKLKV PEWVDTVKLA XHKELAPYDE NWFYTRAAST
	ARHLYLRGGA GVGSMTKIYG GRQRNGVMPS HFSRGSKSVA RRVLQALEGL KMVEKDQDGG
	RKLTPQGQRD LDRIAG
Specificity:	Sus scrofa (Pig)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien
Unaracterístics.	
	cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity: Target Details	cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	cells or by baculovirus infection. Be aware about differences in price and lead time.

Target Details	
Background:	Recommended name: 40S ribosomal protein S19
UniProt:	Q29308
Pathways:	Positive Regulation of Immune Effector Process, Ribonucleoprotein Complex Subunit
	Organization, Ribosome Assembly

## Application Details

Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system
	for secretion and intracellular expression. A protein expressed by the mammalian cell system is
	of very high-quality and close to the natural protein. But the low expression level, the high cost
	of medium and the culture conditions restrict the promotion of mammalian cell expression
	systems. The yeast protein expression system serve as a eukaryotic system integrate the
	advantages of the mammalian cell expression system. A protein expressed by yeast system
	could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the
	native protein conformation. It can be used to produce protein material with high added value
	that is very close to the natural protein. Our proteins produced by yeast expression system has
	been used as raw materials for downstream preparation of monoclonal antibodies.

## Restrictions:

For Research Use only

## Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
