Datasheet for ABIN1622920  
**MSRA Protein (AA 1-160) (His tag)**

### Overview

Quantity:	1 mg
Target:	MSRA
Protein Characteristics:	AA 1-160
Origin:	Rhodospirillales
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This MSRA protein is labelled with His tag.
Application:	ELISA

### Product Details

Sequence:	MATATFAAGC FWGVEETFRK IPGVTGTTVG YTGGHFKEPT YRQVCAGDTG HAEAVRVDYD PDKVTYEQLL DVFWAAHDPT QVDRQGPDIG DQYRSAIFYH DAGQEAAAGA SRARLEQSGA LSRAIATRIE PAGPFWPAEE YHQRYIDKQR ARTGVAPACH
Specificity:	Rhodospirillum rubrum (strain ATCC 11170 / NCIB 8255)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

### Target Details

Target:	MSRA
Alternative Name:	Peptide methionine sulfoxide reductase MsrA (msrA) ( <a href="#">MSRA Products</a> )

## Target Details

---

Background: Recommended name: Peptide methionine sulfoxide reductase MsrA.  
Short name= Protein-methionine-S-oxide reductase.  
EC= 1.8.4.11.  
Alternative name(s): Peptide-methionine (S)-S-oxide reductase.  
Short name= Peptide Met(O) reductase

---

UniProt: [Q2RRT3](#)

## Application Details

---

Comment: The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modified such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

---

Restrictions: For Research Use only

## Handling

---

Format: Lyophilized

---

Concentration: 0.2-2 mg/mL

---

Buffer: Tris-based buffer, 50 % glycerol

---

Handling Advice: Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week

---

Storage: -20 °C

---

Storage Comment: Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
