

Datasheet for ABIN1623170 **ZNF259 Protein (AA 1-459) (His tag)**

Go to Product pag

Overview

Quantity:	1 mg
Target:	ZNF259 (znf259)
Protein Characteristics:	AA 1-459
Origin:	Cow
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This ZNF259 protein is labelled with His tag.
Application:	ELISA

Application:	ELISA

	EDDPEMKVEH YKRTFDQNEE LGLNDMKTEG YETGLPAQR
Specificity:	Bos taurus (Bovine)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien
	cells or by baculovirus infection. Be aware about differences in price and lead time.

Product Details > 90 % Purity: **Target Details** ZNF259 (znf259) Target: Zinc finger protein ZPR1 (ZNF259) (znf259 Products) Alternative Name Background: Recommended name: Zinc finger protein ZPR1. Alternative name(s): Zinc finger protein 259 UniProt: Q2TBX0 **Application Details** The yeast protein expression system is the most economical and efficient eukaryotic system Comment: for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies. Restrictions: For Research Use only Handling Format: Lyophilized Concentration: 0.2-2 mg/mL Buffer: Tris-based buffer, 50 % glycerol
