Datasheet for ABIN1623892 SCN2B Protein (AA 30-159) (His tag)

Overview	
Quantity:	1 mg
Target:	SCN2B
Protein Characteristics:	AA 30-159
Origin:	Dog
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This SCN2B protein is labelled with His tag.
Application:	ELISA
Product Details	
Sequence:	M EVTVPATLNV LNGSDARLPC TFNSCYTVNH KQFSLNWTYQ ECNNCSEEMF LQFRMKIINL
	KLERFQDRVE FSGNPSKYDV SVMLRNVQPE DEGIYNCYIM NPPDRHRGHG KIHLQVLXEE
	PPERDSTVA
Specificity:	Canis familiaris (Dog) (Canis lupus familiaris)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien
	cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %
Target Details	
Target:	SCN2B
Alternative Name:	Sodium channel subunit beta-2 (SCN2B) (SCN2B Products)

Target Details	
Background:	Recommended name: Sodium channel subunit beta-2
UniProt:	Q864L3
Application Details	
Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is
	of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.
Restrictions:	For Research Use only
Handling	
Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
