Datasheet for ABIN1626313

ATP6V1E1 Protein (AA 1-230) (His tag)

Overview

Quantity:	1 mg
Target:	ATP6V1E1
Protein Characteristics:	AA 1-230
Origin:	Arabidopsis thaliana
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This ATP6V1E1 protein is labelled with His tag.
Application:	ELISA

Product Details

Sequence:	MNDGDVSRQI QQMVRFIRQE AEEKANEISV SAEEDFNIEK LQLVEAEKKK IRQDYEKKEK QADVRRKKIDY SMQLNASRIK VLQAQDDIVN AMKDQAAKDL LNVSRDEYAY KQLLKDLIVQ CLLRLKEPSV LLRCREEDLG LVEAVLDDAK EEYAGKAKVH APEVAVDTKI FLPPPPKSND PHGLHCSSGV VLASRDGKIV CENTLDARLD VAFRMKLPVI RKSFLGQVTA
Specificity:	Arabidopsis thaliana (Mouse-ear cress)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

Target Details

Target:	ATP6V1E1
---------	----------

Target Details

Alternative Name:	V-type proton ATPase subunit E1 (VHA-E1) (ATP6V1E1 Products)
Background:	Recommended name: V-type proton ATPase subunit E1. Short name= V-ATPase subunit E1. Alternative name(s): Protein EMBRYO DEF. ECTIVE 2448 Vacuolar H(+)-ATPase subunit E isoform 1 Vacuolar proton pump subunit E1
UniProt:	Q39258
Pathways:	Transition Metal Ion Homeostasis , Proton Transport

Application Details

Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modified such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.
Restrictions:	For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
