Datasheet for ABIN1626345

UBE2H Protein (AA 1-183) (His tag)

\sim	
()\/\	rview
	VICVV

Alternative Name:

Quantity:	1 mg
Target:	UBE2H
Protein Characteristics:	AA 1-183
Origin:	Cow
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This UBE2H protein is labelled with His tag.
Application:	ELISA
Product Details	
Sequence:	MSSPSPGKRR MDTDVVKLIE SKHEVTILGG LNEFVVKFYG PQGTPYEGGV WKVRVDLPDK
	YPFKSPSIGF MNKIFHPNID EASGTVCLDV INQTWTALYD LTNIFESFLP QLLAYPNPID
	PLNGDAAAMY LHRPEEYKQK IKEYIQKYAT EEALKEQEEG TGDSSSESSM SDFSEDEAQD MEL
Specificity:	Bos taurus (Bovine)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien
	cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %
Target Details	
Target:	UBE2H

Ubiquitin-conjugating enzyme E2 H (UBE2H) (UBE2H Products)

Target Details

Background:

Recommended name: Ubiquitin-conjugating enzyme E2 H.

EC= 6.3.2.19.

Alternative name(s): Ubiquitin carrier protein H Ubiquitin-protein ligase H

UniProt:

Q32LN1

Application Details

Comment:

The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions:

For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
