Datasheet for ABIN1626719

POLR2L Protein (AA 1-71) (His tag)

Go to Product page

Overview

Quantity:	1 mg
Target:	POLR2L
Protein Characteristics:	AA 1-71
Origin:	Rape
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This POLR2L protein is labelled with His tag.
Application:	ELISA

Product Details

Sequence:	MIIPVRCFTC GKVIGNKWDA YLDLLQLDYT EGDALDALNL VRYCCRRMLM THVDLIEKLL NYNTLEKSDN S
Specificity:	Brassica napus (Rape)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

Target Details

Target:	POLR2L
Alternative Name:	DNA-directed RNA polymerases I, II, and III subunit RPABC5 (POLR2L Products)

Target Details

Background:	Recommended name: DNA-directed RNA polymerases I, II, and III subunit RPABC5. Short name= RNA polymerases I, II, and III subunit ABC5. Alternative name(s): ABC10 DNA-directed RNA polymerase III subunit L RPB10 homolog
UniProt:	Q39290
Pathways:	Regulatory RNA Pathways

Application Details

Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.
Restrictions:	For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
