

Datasheet for ABIN1626745 INSL6 Protein (AA 20-205) (His tag)

Overview Quantity: 1 mg INSL6 Target: Protein Characteristics: AA 20-205 Origin: Cow Yeast Source: Protein Type: Recombinant Purification tag / Conjugate: This INSL6 protein is labelled with His tag. Application: **ELISA Product Details** Sequence: L NDISRARRLC GQHLLHEIVK LCGDVNWSHV EKEKPFTQLL SQASEKVESF IPDRSESSQT TFPVWRRATN PVPTSASQEE AINNMKMQSL PEYQYKKANL PFKTRQEESS SSQDISPYIH EIIEFQKKNT NKIKTLSNLF WGNHPQRKRR GYSEKCCQKG CTKEELIIAC LPYIDYENLR KHQQL Specificity: Bos taurus (Bovine) Characteristics: Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien cells or by baculovirus infection. Be aware about differences in price and lead time. Purity: > 90 % **Target Details** INSL6 Target: Alternative Name: Insulin-like peptide INSL6 (INSL6) (INSL6 Products)

Target Details

Background:	Recommended name: Insulin-like peptide INSL6.
	Short name= Insulin-like peptide 6 Cleaved into the following 2 chains: 1.
	Insulin-like peptide INSL6 B chain 2.
	Insulin-like peptide INSL6 A chain
UniProt:	Q32L79
Pathways:	Hormone Activity

Application Details

Col	ш	 C.I.	II.

The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions:

For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
