## Datasheet for ABIN1627680 LYSMD2 Protein (AA 1-206) (His tag)

| Overview                      |  |
|-------------------------------|--|
| Quantity:                     | 1 mg   |
| Target:                       | LYSMD2   |
| Protein Characteristics:      | AA 1-206   |
| Origin:                       | Xenopus laevis   |
| Source:                       | Yeast  |
| Protein Type:                 | Recombinant  |
| Purification tag / Conjugate: | This LYSMD2 protein is labelled with His tag.  |
| Application:                  | ELISA  |
| Product Details               |  |
| Sequence:                     | MADLSPVIQP HREGGSRYGY TMFPGLESEA ELSLSLASTK TRSYGSTGSV AAPLAERYIE                                |
|                               | HCLSPSDTLQ GIALKYGVTM EQIKRANKLF STDCIFLRKS LNIPVISKKG SLFNGLGSLD                                |
|                               | SPENETQDTC SSPTEEPALA ESHTVSIDSS AKTNQPIVRS DEELSAKDFL QRLDLQIKRS                                |
|                               | TQAAQRLKEE DDLRHDGSYA TCSYQH   |
| Specificity:                  | Xenopus laevis (African clawed frog)   |
| Characteristics:              | Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien |
|                               | cells or by baculovirus infection. Be aware about differences in price and lead time.            |
| Purity:                       | > 90 %   |
| Target Details                |  |
| Target:                       | LYSMD2   |

| Target Details    |  |
|-------------------|--|
| Alternative Name: | LysM and putative peptidoglycan-binding domain-containing protein 2 (lysmd2) (LYSMD2 Products) |
| Background:       | Recommended name: LysM and putative peptidoglycan-binding domain-containing protein 2          |
| UniProt:          | Q3KPL3   |

## **Application Details**

| Comment: | The yeast protein expression system is the most economical and efficient eukaryotic system         |
|----------|--|
|          | for secretion and intracellular expression. A protein expressed by the mammalian cell system is    |
|          | of very high-quality and close to the natural protein. But the low expression level, the high cost |
|          | of medium and the culture conditions restrict the promotion of mammalian cell expression           |
|          | systems. The yeast protein expression system serve as a eukaryotic system integrate the            |
|          | advantages of the mammalian cell expression system. A protein expressed by yeast system            |
|          | could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the     |
|          | native protein conformation. It can be used to produce protein material with high added value      |
|          | that is very close to the natural protein. Our proteins produced by yeast expression system has    |
|          | been used as raw materials for downstream preparation of monoclonal antibodies.                    |
|          |  |

## Restrictions:

For Research Use only

## Handling

| Format:          | Lyophilized   |
|------------------|---|
| Concentration:   | 0.2-2 mg/mL   |
| Buffer:          | Tris-based buffer, 50 % glycerol  |
| Handling Advice: | Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week |
| Storage:         | -20 °C  |
| Storage Comment: | Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.                                |
