## NR1H4 Protein (AA 1-482) (His tag)

#### Overview

Quantity:	1 mg
Target:	NR1H4
Protein Characteristics:	AA 1-482
Origin:	Cow
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This NR1H4 protein is labelled with His tag.
Application:	ELISA

Product Details	
Sequence:	MVMQFQELEN PVQISPCHSH TSSGFDMEVM SMKPAKGVLT EQVAGPLGQN LEVEPYSQYN
	NVQFPQVQPQ ISSSSYYSNV GFYPQQPEEW YSPGIYELRR MPAETLYQGE TEVVEIPITK

	QVTSTTKSCR EKTELTPDQQ NLLHYIMDSY SKQRMPQEIT NKFLKEEFSA EENFIILTEM
	ATSHVQVLVE FTKKLPGFQT LDHEDQIALL KGSAVEAMFL RSAEIFSKKL PAGHTDLLEE
	RIRKSGISDE YITPMFSFYK SVAELKMTQE EYALLTAIVI LSPDRQYIKD REAVEKLQEP
	LLDVLQKLCK IHQPENPQHF ACLLGRLTEL RTFNHHHADM LMSWRVNDHK FTPLLCEIWD VQ
Specificity:	Bos taurus (Bovine)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien
	cells or by baculovirus infection. Be aware about differences in price and lead time.

# **Product Details** > 90 % Purity: **Target Details** Target: NR1H4 Bile acid receptor (NR1H4) (NR1H4 Products) Alternative Name Background: Recommended name: Bile acid receptor. Alternative name(s): Farnesoid X-activated receptor Farnesol receptor HRR-1 Nuclear receptor subfamily 1 group H member 4 UniProt: Q3SZL0 Pathways: Nuclear Receptor Transcription Pathway, Steroid Hormone Mediated Signaling Pathway, Regulation of Carbohydrate Metabolic Process **Application Details** Comment: The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions: For Research Use only

### Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week

## Handling

Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
