Datasheet for ABIN1628154  
**SNRPD2 Protein (AA 2-118) (His tag)**

### Overview

Quantity:	1 mg
Target:	SNRPD2
Protein Characteristics:	AA 2-118
Origin:	Cow
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This SNRPD2 protein is labelled with His tag.
Application:	ELISA

### Product Details

Sequence:	SLLNPKKSE MTPEELQKRE EEEFNTGPLS VLTQSVKNNT QVLINCRNNK KLLGRVKAFD RHCNMVLENV KEMWTEVPKS GKGKSKPV NKDRYISKMF LRGDSVIVVL RNPLIAGK
Specificity:	Bos taurus (Bovine)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

### Target Details

Target:	SNRPD2
Alternative Name:	Small nuclear ribonucleoprotein Sm D2 (SNRPD2) ( <a href="#">SNRPD2 Products</a> )

## Target Details

---

Background: Recommended name: Small nuclear ribonucleoprotein Sm D2.  
Short name= Sm-D2.  
Alternative name(s): snRNP core protein D2

---

UniProt: [Q3SZF8](#)

---

Pathways: [Ribonucleoprotein Complex Subunit Organization](#)

---

## Application Details

---

Comment: The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modified such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

---

Restrictions: For Research Use only

---

## Handling

---

Format: Lyophilized

---

Concentration: 0.2-2 mg/mL

---

Buffer: Tris-based buffer, 50 % glycerol

---

Handling Advice: Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week

---

Storage: -20 °C

---

Storage Comment: Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.

---
