Datasheet for ABIN1628853 PSBQ-2 Protein (AA 85-230) (His tag)

Target:	PSBQ-2
Target Details	
Purity:	> 90 %
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien cells or by baculovirus infection. Be aware about differences in price and lead time.
Specificity:	Arabidopsis thaliana (Mouse-ear cress)
Sequence:	IPIKVG GPPLPSGGLP GTDNSDQARD FSLALKDRFY IQPLSPTEAA ARAKDSAKEI INVKSFIDKK AWPYVQNDLR LRASYLRYDL NTVISAKPKE EKQSLKDLTA KLFQTIDNLD YAARSKSSPD AEKYYSETVS SLNNVLAKLG
Product Details	
Application:	ELISA
Purification tag / Conjugate:	This PSBQ-2 protein is labelled with His tag.
Protein Type:	Recombinant
Source:	Yeast
Origin:	Arabidopsis thaliana
Protein Characteristics:	AA 85-230
Target:	PSBQ-2
Quantity:	1 mg

Target Details	
Background:	Recommended name: Oxygen-evolving enhancer protein 3-2, chloroplastic.
	Short name= 0EE3.
	Alternative name(s): 16 kDa subunit of oxygen evolving system of photosystem II O.
	EC 16 kDa subunit
UniProt:	Q41932

Application Details

Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system
	for secretion and intracellular expression. A protein expressed by the mammalian cell system is
	of very high-quality and close to the natural protein. But the low expression level, the high cost
	of medium and the culture conditions restrict the promotion of mammalian cell expression
	systems. The yeast protein expression system serve as a eukaryotic system integrate the
	advantages of the mammalian cell expression system. A protein expressed by yeast system
	could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the
	native protein conformation. It can be used to produce protein material with high added value
	that is very close to the natural protein. Our proteins produced by yeast expression system has
	been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions:

For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
