| Quantity:                     | 1 mg   |
|-------------------------------|--|
| Target:                       | ZNF322A  |
| Protein Characteristics:      | AA 1-402   |
| Origin:                       | Cynomolgus   |
| Source:                       | Yeast  |
| Protein Type:                 | Recombinant  |
| Purification tag / Conjugate: | This ZNF322A protein is labelled with His tag.   |
| Application:                  | ELISA  |
| Product Details               |  |

| Target Details    |   |
|-------------------|---|
| Target:           | ZNF322A   |
| Alternative Name: | Zinc finger protein 322 (ZNF322) (ZNF322A Products)   |
| Background:       | Recommended name: Zinc finger protein 322.<br>Alternative name(s): Zinc finger protein 322A |
| UniProt:          | Q4R7X8  |

## Application Details

| Comment: | The yeast protein expression system is the most economical and efficient eukaryotic system         |
|----------|--|
|          | for secretion and intracellular expression. A protein expressed by the mammalian cell system is    |
|          | of very high-quality and close to the natural protein. But the low expression level, the high cost |
|          | of medium and the culture conditions restrict the promotion of mammalian cell expression           |
|          | systems. The yeast protein expression system serve as a eukaryotic system integrate the            |
|          | advantages of the mammalian cell expression system. A protein expressed by yeast system            |
|          | could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the     |
|          | native protein conformation. It can be used to produce protein material with high added value      |
|          | that is very close to the natural protein. Our proteins produced by yeast expression system has    |
|          | been used as raw materials for downstream preparation of monoclonal antibodies.                    |
|          |  |

For Research Use only

## Handling

| Format:          | Lyophilized   |
|------------------|---|
| Concentration:   | 0.2-2 mg/mL   |
| Buffer:          | Tris-based buffer, 50 % glycerol  |
| Handling Advice: | Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week |
| Storage:         | -20 °C  |
| Storage Comment: | Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.                                |
