Datasheet for ABIN1629806
APS2 Protein (AA 1-145) (His tag)

Overview

Quantity:	1 mg
Target:	APS2
Protein Characteristics:	AA 1-145
Origin:	Emericella nidulans
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This APS2 protein is labelled with His tag.
Application:	ELISA

Product Details

Sequence:	MVLSFILVQN RQGKTRLAKW YAPYSDEEKV KLKGEVHRLV APRDQKYQSN FVEFKRSTKI VYRRYAGLFF CACVDATDNE LAYLEAIHFF VEVDLQFFGN VCELDLVFNF YKVYAILDEV FLAGEIEETS KQVVLTRLEH LDKLE
Specificity:	Emericella nidulans (strain FGSC A4 / ATCC 38163 / CBS 112.46 / NRRL 194 / M139) (Aspergillus nidulans)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

Target Details

Target:	APS2
---------	------

Target Details

Alternative Name:	AP-2 complex subunit sigma (aps2) (APS2 Products)
Background:	Recommended name: AP-2 complex subunit sigma. Alternative name(s): Adaptin small chain Clathrin assembly protein 2 small chain Sigma2-adaptin
UniProt:	Q5BFF8

Application Details

Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modified such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.
Restrictions:	For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
