

## Datasheet for ABIN1630167

## LRRC63 Protein (AA 1-607) (His tag)

## Overview

Quantity:	1 mg
Target:	LRRC63
Protein Characteristics:	AA 1-607
Origin:	Rat
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This LRRC63 protein is labelled with His tag.
Application:	ELISA

Furnication tag / Conjugate.	This Ennous protein is labelled with his tag.	
Application:	ELISA

	cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %
Target Details	
Target:	LRRC63
Alternative Name:	Leucine-rich repeat-containing protein 63 (Lrrc63) (LRRC63 Products)
Background:	Recommended name: Leucine-rich repeat-containing protein 63
UniProt:	Q4V8G0
Application Details	
Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has

Restrictions:

For Research Use only

## Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.

been used as raw materials for downstream preparation of monoclonal antibodies.
