## Datasheet for ABIN1630194 MRPS24 Protein (AA 32-163) (His tag)

| Overview                      |  |
|-------------------------------|--|
| Quantity:                     | 1 mg   |
| Target:                       | MRPS24   |
| Protein Characteristics:      | AA 32-163  |
| Origin:                       | Zebrafish (Danio rerio)  |
| Source:                       | Yeast  |
| Protein Type:                 | Recombinant  |
| Purification tag / Conjugate: | This MRPS24 protein is labelled with His tag.  |
| Application:                  | ELISA  |
| Product Details               |  |
| Sequence:                     | KNRAARIRV GKGDRPLTYE QAHHPHHISH RKGWLSQHTG NLHAEGGAAE RVLEDVFIRR                                 |
|                               | FIFGTFHSCL ADELVIKRRG NVLIICAVMI QKLLPSKFYF LLGYTEELLS HFYKCPVKME                                |
|                               | LQLVDEKVVY KYL   |
| Specificity:                  | Danio rerio (Zebrafish) (Brachydanio rerio)  |
| Characteristics:              | Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalier |
|                               | cells or by baculovirus infection. Be aware about differences in price and lead time.            |
| Purity:                       | > 90 %   |
| Target Details                |  |
| Target:                       | MRPS24   |
| Alternative Name:             | 28S ribosomal protein S24, mitochondrial (mrps24) (MRPS24 Products)                              |

| Target Details            |   |
|---------------------------|---|
| Background:               | Recommended name: 28S ribosomal protein S24, mitochondrial.<br>Short name= MRP-S24.<br>Short name= S24mt  |
| UniProt:                  | Q502C1  |
| Application Details       |   |
| Comment:<br>Restrictions: | The yeast protein expression system is the most economical and efficient eukaryotic system<br>for secretion and intracellular expression. A protein expressed by the mammalian cell system is<br>of very high-quality and close to the natural protein. But the low expression level, the high cost<br>of medium and the culture conditions restrict the promotion of mammalian cell expression<br>systems. The yeast protein expression system serve as a eukaryotic system integrate the<br>advantages of the mammalian cell expression system. A protein expressed by yeast system<br>could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the<br>native protein conformation. It can be used to produce protein material with high added value<br>that is very close to the natural protein. Our proteins produced by yeast expression system has<br>been used as raw materials for downstream preparation of monoclonal antibodies.<br>For Research Use only |
| Handling                  |   |
| Format:                   | Lyophilized   |
| Concentration:            | 0.2-2 mg/mL   |
| Buffer:                   | Tris-based buffer, 50 % glycerol  |
| Handling Advice:          | Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week   |
| Storage:                  | -20 °C  |
| Storage Comment:          | Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.  |
