Datasheet for ABIN1630689  
**RBMX Protein (AA 1-390) (His tag)**

### Overview

Quantity:	1 mg
Target:	RBMX
Protein Characteristics:	AA 1-390
Origin:	Rat
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This RBMX protein is labelled with His tag.
Application:	ELISA

### Product Details

Specificity:	Rattus norvegicus (Rat)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

## Target Details

---

Target:	RBMX
Alternative Name:	RNA-binding motif protein, X chromosome (Rbmx) ( <a href="#">RBMX Products</a> )
Background:	Recommended name: RNA-binding motif protein, X chromosome. Alternative name(s): Heterogeneous nuclear ribonucleoprotein G. Short name= hnRNP G RNA-binding motif protein, X chromosome retrogene RNA-binding motif protein, X chromosome retrogene-like Cleaved into the following chain: 1. RNA-binding motif protein, X chromosome, N-terminally processed
UniProt:	<a href="#">Q4V898</a>
Pathways:	<a href="#">Chromatin Binding</a> , <a href="#">Ribonucleoprotein Complex Subunit Organization</a>

## Application Details

---

Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modified such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.
Restrictions:	For Research Use only

## Handling

---

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
