

Datasheet for ABIN1632652

NPL Protein (AA 1-305) (His tag)[Go to Product page](#)

Overview

Quantity:	1 mg
Target:	NPL
Protein Characteristics:	AA 1-305
Origin:	Xenopus tropicalis
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This NPL protein is labelled with His tag.
Application:	ELISA

Product Details

Sequence:	MEFAGKRLKG LIAATFTPMT SNSDINLPVI KQYVDYLVQK QHVRNIFVNG TTGEGMSLSV QERKCLAEW VKQARGKMDN VIIHVGCLSL SDSKDAAHA ASCGADAISI VCPSFLKPSS LDALVLYMKE VAFAAPSLPF YYYHIPRLTG TTYQICELLR KAKENIPSFR GVKFTDVNLM DFGLCVSQYK EFDCLYGVDE QLLGALAFGA HGAVGSTYNY LGKKNGDMMA AFEGGNLQEA RKIQCSLQEF LLFVFDMGWG LPEFKDIMSQ ISGIPLGPPR LPLYSSVKSD HHDSIRTKML KLDLI
Specificity:	Xenopus tropicalis (Western clawed frog) (Silurana tropicalis)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

Target Details

Target:	NPL
Alternative Name:	N-acetylneuraminate lyase (npl) (NPL Products)
Background:	<p>Recommended name: N-acetylneuraminate lyase.</p> <p>Short name= NALase.</p> <p>EC= 4.1.3.3.</p> <p>Alternative name(s): N-acetylneuraminate pyruvate-lyase N-acetylneuraminic acid aldolase</p> <p>Sialate lyase Sialate-pyruvate lyase Sialic acid aldolase Sialic acid lyase</p>
UniProt:	Q5M905

Application Details

Comment:	<p>The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modified such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.</p>
Restrictions:	For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
