Datasheet for ABIN1632937 GINS3 Protein (AA 1-177) (His tag)

Overview	
Quantity:	1 mg
Target:	GINS3
Protein Characteristics:	AA 1-177
Origin:	Candida albicans
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This GINS3 protein is labelled with His tag.
Application:	ELISA
Product Details	
Sequence:	MTTDYYDLDD ILADSEKLTC KFNITVPGLG YLEGNPGKPI HEDTKLELPH WLSGILATVA
	IDEDSNINFL DLADPDIIKE KVINAIKTDP LAVDLHKLTP YYYSLILKWG NLYTDKTLIA
	NVMNCLKARS LEIYNFSNNA NKTLNNEFLY TLDEFERALF KSTSDSNKSM RKWLKTK
Specificity:	Candida albicans (strain SC5314 / ATCC MYA-2876) (Yeast)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien
	cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %
Target Details	
Target:	GINS3
Alternative Name:	DNA replication complex GINS protein PSF3 (PSF3) (GINS3 Products)

Target Details	
Background:	Recommended name: DNA replication complex GINS protein PSF3
UniProt:	Q5AFK3
Application Details	
Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression
	systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.
Restrictions:	For Research Use only
Handling	
Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
