

Datasheet for ABIN1633255

Family with Sequence Similarity 220, Member A (FAM220A) (AA 1-259) protein (His tag)

[Go to Product page](#)

Overview

Quantity:	1 mg
Target:	Family with Sequence Similarity 220, Member A (FAM220A)
Protein Characteristics:	AA 1-259
Origin:	Cynomolgus
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	His tag
Application:	ELISA

Product Details

Sequence:	MRDRRGS�GT CLAQVQQARG GDSNKLSYS� KKRMPMEGLW PADAPSWMNK PVVDGNSQSE ALSLEMRKDP SGAGPWLHGG GPVLPYVKES VRRNPASAAT RSTAVGLLPA PTECFAQVAC SGVEALERDW LGGGARATDG HRGQCPKGEP RVSRLLCCHQK LPEMGSFQDD PPNALPKGLG SELEPSCLSHS VLSATLHACP EVLLNDETKR VFLDRLKPMF SKQTMEFKKM LKNTSDGLQI TLGLLALQPF ELANSLCHS
Specificity:	Macaca fascicularis (Crab-eating macaque) (Cynomolgus monkey)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

Target Details

Target:	Family with Sequence Similarity 220, Member A (FAM220A)
Alternative Name:	Protein FAM220A (FAM220A) (FAM220A Products)
Background:	Recommended name: Protein FAM220A. Alternative name(s): STAT3-interacting protein as a repressor
UniProt:	Q4R3X9

Application Details

Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modiflicated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.
Restrictions:	For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
